

THOMSON
Linear Motion. Optimized.
WELCOME TO THOMSON AT MOTEK TRADE FAIR!

OCTOBER 6 - 9, 2014
STUTTGART
Motek
HALL 3
STAND
NO. 3451

Thomson invented anti-friction technology over sixty year ago and has been a global leader in linear motion technology ever since. Thomson is a trusted partner when it comes to finding the optimum balance between performance and installed costs.

Come and see for yourself – we invite you to visit our stand at MOTEK 2014 in Stuttgart, Germany. On display will be a full range of new and innovative products and application solutions. Speak with our knowledgeable stand personnel about how the broad range of Thomson mechanical motion products can help you build a better machine, faster.

The international trade fair Motek is the world's leading event in the fields of production and assembly automation, feed technology and material flow, streamlining through handling technology, and industrial handling.

**Designing Machines and Equipment
with Miniature Components:
Part 3 – Miniature System & Brake Technology**

Tuesday, September 9, 2014 at:

WEST (London, UK)	1 p.m.
CEST (Berlin, Germany)	2 p.m.
IST (India)	5:30 p.m.

As the demand for smaller machines grows, engineers are faced with the particular challenges miniaturization presents.

Join Thomson for **the third in a series of 3 mini webinars** on designing machines with miniature components.

If you missed the first two webinars don't worry! [They all can be viewed in our webinar archive >>>](#)

+ applications/tools/products

Thomson offers the largest range of mechanical motion components – standard and modified.

Thomson customers benefit every day. In addition to standard specifications, we offer stainless steel, washdown/chemical protection and customisation for:

- Round and profile rail bearings and guides
- Ball and lead screws
- Linear and precision linear actuators
- Linear motion systems
- Clutches and brakes
- Gearheads

Our products perform as promised, and we back them with outstanding engineering support and global distribution. All working to help achieve the **optimal balance of performance, life and cost.**
